Program & Enablement Leader — AI-Driven Learning Strategist

Program & Enablement Leader with 19+ years of experience driving **enterprise AI adoption, capability development, and digital transformation**. Proven ability to scale enablement programs, build data-driven ecosystems, and bridge **business, learning, and technology** to deliver measurable impact.

Expertise in **AI enablement, program management, learning transformation, and analytics-driven decision-making**.

Core Competencies

- Program & Project Management | Stakeholder Engagement | Change Management
- AI Enablement | Generative AI | Digital Adoption
- Learning Strategy & Capability Development
- Data Analytics | Dashboards | Automation (Python, SQL, BI Tools)
- LMS Platforms | Enablement Ecosystems | Executive Communication

Professional Experience

Specialist – Learning & Development (Program Manager – AI Enablement & Adoption)

Jul 2022 – Present

EdgeVerve Systems

Led enterprise-wide AI enablement and adoption programs across internal teams, customers, and partners.

- Scaled AI enablement initiatives to 2000+ employees, accelerating adoption of AI platforms
- Enabled 1000+ customer and partner users through targeted, use-case-driven programs
- Built and managed a full-stack enablement ecosystem (ILT, eLearning, certifications, LMS)
- Transformed learning analytics from monthly → weekly reporting, improving decision-making speed
- Built automated data pipelines using Python + Postgres and developed dashboards using Superset
- Developed AI-driven solutions:
- Automated documentation analysis from product demos
- GenAI-powered eLearning content/script generation
- Contributed to deployment, troubleshooting, and maintenance of Kubernetes-based platforms
- Acted as a bridge between product, engineering, and delivery teams to drive adoption

Senior Operations Manager – Learning & Development

Oct 2018 – Jun 2022

Infosys BPM Ltd

Led large-scale learning operations and workforce capability development initiatives.

- Managed enterprise learning programs across cloud (AWS, Azure, GCP) and business skills
- Led certification strategy and training operations to improve workforce readiness
- Enhanced BI dashboards and reporting frameworks, enabling data-driven decision-making
- Partnered with stakeholders to align learning initiatives with business goals
- Led LMS transformation and change management initiatives, improving adoption and user experience

PMO Operations Manager
Infosys BPM Ltd

Mar 2012 – Sep 2018

Enabled program management capabilities and knowledge systems for large-scale operations.

- Delivered PMO enablement programs for 1000+ managers, including onboarding and tool adoption
- Built knowledge management systems (video content, wikis) to improve access to organizational knowledge
- Standardized processes and supported governance practices across programs
